Safwat Fathi

Software Developer | Front-End | Back-End Enthusiast
Giza, Al Jizah, Egypt

Summary

I'm a passionate front-end web developer with a knack for crafting seamless user experiences. My journey in the digital realm has led me to master a diverse stack of technologies, including HTML, CSS, JavaScript, TypeScript, ReactJS, VueJS, NextJS, and NuxtJS. Whether it's building responsive interfaces or optimizing performance, I thrive on turning ideas into elegant code.

On the back end, I've delved into the world of NodeJS and ExpressJS, where I've honed my skills in creating robust APIs and handling data persistence. My experience spans both NoSQL and SQL databases.

Proven track record of contributing to the development of highly scalable applications with over 800k users and valued between \$500K to 1M USD. The thrill of seeing my work impact such a large audience drives me to continuously improve and innovate. I'm particularly drawn to the challenges of real-time applications, where every millisecond counts. Whether it's live chat features or dynamic data updates, I relish the opportunity to make interactions feel instantaneous.

Beyond the UI, I'm also a problem-solving enthusiast. I've tackled over 35+ challenges on LeetCode, honing my understanding of data structures and algorithmic approaches. This translates to writing clean, efficient, and scalable code for any project.

My approach to software development is grounded in a solid understanding of object-oriented programming (OOP) and functional programming principles. I believe that clean code is not just a preference—it's a necessity. I strive for maintainable, modular solutions that empower teams to iterate and scale efficiently.

In addition to my technical skills, I have a passion for knowledge sharing. I have written articles on various web development topics

and have been responsible for documenting a project I worked on, ensuring comprehensive and accessible information for team members and stakeholders.

Experience

Naseej

Senior Frontend Developer

March 2024 - Present (7 months)

* Working on Medad platform a Cloud Platform that provides solutions for 100+ Organizations across Middle-east

Fudex EBS

Senior Frontend Developer

March 2023 - June 2023 (4 months)

Cairo, Egypt

* Developed and maintained a robust CV Builder website using Next.js and TypeScript.

* Ensured optimal performance and scalability with PM2 deployment on a DigitalOcean droplet.

Technology Strategies Middle East - TSME

Frontend Developer

December 2022 - May 2023 (6 months)

Jobzella Digital Solutions

Frontend Developer

February 2022 - December 2022 (11 months)

Egypt

* Designed and developed a modern user interface for Jobzella, a leading job-finding and recruitment platform in the Egypt, serving over 800K users.

* Leveraged Next.js to optimize website performance and deliver a seamless user experience for both job seekers and recruiters.

* Implemented the user profile feature and collaborated in company creation steps and compay profile.

* Collaborated closely with back-end developers for smooth data integration and API interaction.

AHBS

Frontend Developer

November 2021 - February 2022 (4 months)

Cairo, Egypt

Algoriza

Frontend Developer

June 2021 - November 2021 (6 months)

Giza, Al Jizah, Egypt

- * Implemented a brand new user interface for YaSchools, a high-traffic platform (10K - 50K users) serving as a directory for KSA located schools.
- * Utilized VueJS to build a dynamic and engaging user experience for school searching and exploration.
- * Developed a real-time chat feature using Firebase, facilitating communication needs within the platform.

Cultiv LLC

Frontend Developer

October 2020 - May 2021 (8 months)

Cairo, Egypt

- Implement internal products for the company.
- Implement web applications for clients.

MaxyCode

Frontend Developer

October 2019 - October 2020 (1 year 1 month)

Cairo Governorate, Egypt

- * Leveraged ReactJS and a robust front-end tech stack (HTML, CSS, JavaScript, BabelJS, GulpJS, SASS) to build dynamic and interactive user interfaces for client projects.
- * Collaborated with back-end developers to integrate with RESTful APIs, ensuring seamless data flow within applications.
- * Collaborated with teams to deliver high-quality solutions aligned with client requirements.
- * Contributed to creating intuitive user interfaces and optimizing application performance

New Cairo Academy

Frontend Developer

July 2018 - December 2018 (6 months)

Cairo, Egypt

- * Developed and maintained internal web solutions to streamline day-to-day operations for the academy.

* Built user-friendly interfaces catering to both administration and student needs.

* Utilized a comprehensive tech stack including HTML, CSS, JavaScript, BabelJS, GulpJS, SASS, and interacted with RESTful APIs.

NACITA Corp.

Technical Supervisor

June 2016 - January 2017 (8 months)

Cairo Governorate, Egypt

Education

Cairo University

Associate's degree, Computer Science · (2017 - January 2021)

Udacity

Nanodegree, Computer Software Engineering · (October 2022 - January 2023)

The Higher Institute for Cooperative and Administrative studies

Bachelor of Commerce (B.Com.), Business Administration and Management,
General
